DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 27 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Under the most recent interpretation of the 35 U.S.C. 101 Interim Guidelines, claims 1-26, albeit system claims, define relationships that are functional descriptive in nature that do not impart functional change in the computer, and as such, are non-statutory. (Warmerdam, 33 F.3d at 1360-1361, 31 USPQ2d at 1759, 1760, 1760). Examiner recommends two possible claim language structures to overcome the 35 U.S.C. 101 – 1) “A computer implemented method encoding computer executable instructions onto a computer readable medium, when executed causing a computer to perform steps comprising: generating at least one hierarchical.....” or 2) “A computer readable medium encoded with computer executable program instructions, said computer readable executable instructions causing a computer to perform method steps comprising: generating at least one hierarchical...”.

Art Unit: 2626

Allowable Subject Matter

3. Claims 1-27 are allowed over the prior art of record, and would be allowed when amended to overcome the 35 U.S.C. 101 rejection as noted above.

4. The following is a statement of reasons for the indication of allowable subject matter:

As per the independent claim, the claim limitations pertaining to a hierarchical document (containing a mapping of content pages of logic or dialog services) that is processed by a client to activate the content pages or the logic of the dialog services within the hierarchical structured document so as to allow a user to directly access any one of the content pages or dialog services is not explicitly taught by the prior art of record.
